Objective

Recently graduated from Richfield Institution with a Diploma in Information Technology. Self-motivated individual who is actively seeking opportunities to develop the best web applications. Excellent at problem-solving, organizing, and development.

Core Skills

Richfield Institution (2021-2023)

- PHP
- JavaScript
- HTML
- CSS
- Java
- React.js
- Node.js
- Git and GitHub
- Microsoft Office
- Communication
- Problem-solving

Experience

Tobb Technologies (06 December 2023- 24 April 2024)

Web development Internship.

- Working on developing proper documentation for people who are new to smart contract development in Cardano. The primary languages I am working on are Aiken for the on-chain code and Lucid (framework built in JavaScript/typescript) for the off-chain code. I've also created tutorial videos to accompany the documentation.
- Skills gained project management, communication, Team leadership, and collaboration.
- Working with Tobb Technologies also helped me advance my programming skills in languages such as JavaScript.

Web developer

Personal Portfolio

- This is my portfolio where I showcase some of my skills using React.js.
- The website highlights my personality, and it has links to my other projects.

Hair salon project

Web application for a hair salon

- In my final year my team at school created a web application that helps people to book their hair appointments online using HTML, CSS, JavaScript, and PHP.
- Skills gained leadership, communication, and collaboration.
