- CSS
- Java
- React.js
- Node.js
- Git and GitHub
- Microsoft Office
- Communication
- Problem-solving

Education

Richfield institution (2021-2023)

Diploma in Information Technology

Experience

Tobb Technologies (06 December 2023- 24 April 2024)

Web development Internship.

- Working on developing proper documentation for people who are new to smart contract development in Cardano. The primary languages I am working on are Aiken and Lucid (framework built in JavaScript/typescript). I also created tutorial videos.
- Skills gained project management, communication, Team leadership, and collaboration.
- Working with Tobb Technologies also helped me advance my skills in JavaScript.

Web developer

Personal Portfolio

- This is my portfolio where I showcase some of my skills using React.js.
- The website highlights my personality, and it has links to my other project.

Hair salon project

Web application for a hair salon

- In my final year my team at school created a web application that helps people to book their hair appointments online using HTML, CSS, JavaScript, and PHP.
- Skills gained leadership, communication, and collaboration.
